## NEVADA MING TREE COMPANY

# The magic cactus garden

WITH NATURE'S SPONGE ROCK PLANTER

## 5 cactus plants included

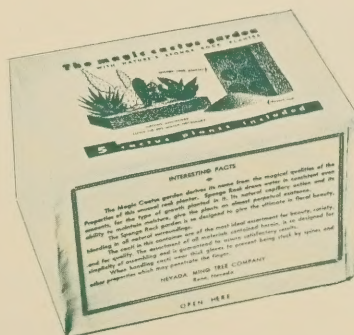

The Magic Cactus Garden derives its name from the magical qualities of the properties of this unusual rock planter. Sponge Rock, as this is commonly called, is known for its excellent ability to absorb and retain moisture in equal amounts. It is a natural formation which we process to make it the ideal planter. The Wonderful capillary qualities of the Sponge Rock make it possible for plants to thrive without the need of fancy bowls, special containers, and other deep dish arrangements that are so common for most types of floral growth. Sponge Rock with the combination of desert soil and cacti, needs very little moisture to keep the plants healthy. In many instances, especially in damp places, the Sponge Rock Planter will draw sufficient quantities of water from the atmosphere to keep the cacti alive for very long periods of time.

To assemble the Magic Cactus Garden, simply fill each of the five wells in the Sponge Rock Planter with the desert soil that comes in the package. Remove each of the five cacti from its airproof wrappings and pack into soil filled wells and dampen, packing earth around the roots of the plant for support. After this is done, planter may be placed in a flat tray, dish, bowl, or any container which will avoid leakage. Pour small amounts of water on top or bottom of the planter. Little dish garden or nick-nack ornaments may be placed for additional scenery on the flat surface around the cacti.

The Magic Cactus Garden contains five dwarf size rare cacti, the Sponge Rock Planter, approximate size 1 1/4 by 4 by 6 inches, a bag of genuine desert soil. Each box is imprinted for over the counter sales, and with printed mailing form displayed predominately on the bottom side of the box.

Full instructions on the Magic Cactus Garden are printed on the box. Size of the box is approximately 4 by 4 by 6 inches.

Prices subject to change without prior notice.

**DEALERS ATTENTION:** The cactus plants are so wrapped as to prevent decay of plants for long periods of time. The problem of spoilage is practically extinct if sold in a normal course of time. All prices quoted below are net, f.o.b. Reno, Nevada. Shipping weight per dozen boxes approximately 14 pounds.

PRICE
